Hydrofluoric Acid 49%

GENERAL DESCRIPTION:

Hydrofluoric Acid is a clear, slightly fuming and highly corrosive liquid. It is found as a solution when hydrogen fluoride is combined with water.

APPLICATIONS:

- ◆ Oil refining
- ◆ Production of fluorides
- ◆ Etchant & cleaning agent
- ◆ Production of organofluorine compounds

PHYSICAL PROPERTIES:

- ◆ Appearance: clear liquid
- ◆ Color: clear
- ◆ Boiling range: 219-225°F
- ◆ Specific Gravity @ 20°C: 1.17

HANDLING & STORAGE:

Handling: Clean and dry piping equipment & circuits before any operations. Used in a closed system away from water. Handle only small quantities at a time. Use only in well ventilated areas. Always transfer by pump or gravity. Keep away from incompatible products at all times.

Storage: Keep containers tightly closed and in a cool, well ventilated place. Keep away from heat.
