# SODIUM HYDROXIDE (50%)

## GENERAL DESCRIPTION:

Sodium Hydroxide, commonly known as caustic soda, is an inorganic compound that has a variety of industrial applications. This material serves as a strong liquid base that is soluble in water.

## APPLICATIONS:

- ◆ Manufacture of pulp & paper
- ◆ Textiles
- ◆ Drinking water
- ◆ Soaps and Detergents
- ◆ Drain Cleaner
- ◆ Food & Beverage Industry

## PHYSICAL PROPERTIES:

- ◆ Color: Clear to colorless
- ◆ Melting Point: 12°C
- ◆ Solubility in Water: Soluble
- ◆ Odor: Odorless
- ◆ pH: 14

## STORAGE & HANDLING:

This material should be stored in properly designed and constructed tanks that are suitable for sodium hydroxide. Mild steel is generally viewed as an acceptable material for storage.
